Call for Papers

Aviation Psychology and Applied Human Factors

Open for Submissions

Aviation Psychology and Applied Human Factors publishes innovative, original, high-quality applied research covering all aspects of the aerospace domain. In order to make the journal accessible to both practitioners and scientific researchers, the contents are broadly divided into original scientific research articles and papers for practitioners.

The fully peer-reviewed Original Articles cover a variety of methodological approaches, ranging from experimental surveys to ethnographic and observational research, from those psychological and human factors disciplines relevant to the field, including social psychology, cognitive psychology, and ergonomics. High-quality critical review articles and meta-analyses cover particular topics of current scientific interest. Shorter studies are published as Research Notes.

APAHF in Practice consists of less technically written, but still fully peer-reviewed articles covering a wide range of topics, such as comments on incidents and accidents, innovative applications of aviation psychology, reviews of best practices in industry, book reviews and meeting reports.

Finally, the journal’s News and Announcements section features past and upcoming events around the world, association news, interviews, and similar reports.

Interested in publishing with APAHF?

The journal invites you to submit papers on all aspects of the field!
Manuscript Submission and Timeline

If you would like to submit but are not sure if your article fits the journal please do not hesitate to contact us on journal@eaap.net, or admin@eaap.net for technical advice.
