Methodology is the official organ of the European Association of Methodology. This association is a union of methodologists working in different areas of the social and behavioral sciences (e.g., psychology, sociology, economics, educational and political sciences). The aim of the journal is to present a platform for an interdisciplinary exchange of methodological research and applications in the different fields. There are three main disciplines to be covered: data analysis, research methodology, and psychometrics.

The journal will be open for publishing new methodological approaches, review articles, software information, and instructional papers that can be used in teaching. The articles published in the journal should not only be accessible to methodologists but also to more applied researchers in the different disciplines.

***Methodology* publishes the following type of articles**

Original Articles, Tutorials

Original Articles

The journal will be open for publishing new methodological approaches to data analysis, research designs and measurement for current issues within methodology broadly conceived in social and behavioural sciences. *Methodology* is open to a variety of manuscripts that include research on measurement processes, data analysis, research designs, statistical techniques, tools, and procedures, both of quantitative and qualitative nature. The articles published in the journal should not only be accessible to methodologists but also to more applied researchers in the different disciplines. Articles that focus on a substantive research problems in the social and behavioral sciences are not in scope; articles have to be methodological in nature.

Tutorials

The aim of *Methodology* is also to provide instructional articles on data analysis, research methodology, and psychometrics for teaching and learning. These articles should be designed to be learner-orientated and could include guidelines for applications, empirical examples using real or simulated data sets, software code and data sets of different topics to help applied researchers. The target audiences include college faculty, post-graduate and doctoral students, and applied researchers. It is highly recommended that the example data sets and software setups mentioned in those articles be publicly available. The articles included in this section must be helpful in gaining a better understanding and use of the data analysis, research methodology, and psychometrics.

Manuscript Submission

Submission of manuscripts is taken to imply that neither the manuscript nor any component of it has already been published or is currently under consideration by another journal.

All manuscripts should be submitted online at
<http://www.editorialmanager.com/methodology>

Please follow the online instructions for submission. Should you have any technical queries regarding this process, please contact Juliane Munson, Hogrefe Publishing (E-mail production@hogrefe.com, Tel. +49 551 99950-422, Fax +49 551 99950-425). Please direct any editorial questions to one of the editorial offices:

José Luis Padilla (University of Granada, Spain): E-mail methodologyjournal@ugr.es

Jost Reinecke (University of Bielefeld, Germany): E-mail jost.reinecke@uni-bielefeld.de

Manuscript Preparation

Manuscripts should be prepared according to the *Publication Manual of the American Psychological Association* (6th ed.). In particular, statistical and mathematical copy, references (including DOIs) and their text citations should conform to the Publication Manual. Appropriate ethical guidelines should have been followed in the conduct of research and data gathering.

Manuscripts should not exceed 6,000 words, including references, appendices, tables, and figures, with a maximum of 6 figures.

- *Title page*: A separate title page should contain the title of the article, contact information of corresponding author (name, department, postal address, e-mail address), e-mail addresses and affiliations of all authors, and author note with acknowledgments and disclosures.
- *Abstract and keywords*: A one-paragraph abstract of no more than 150 words, and between 4 and 8 keywords to appropriately define the subject.
- *Tables* should be numbered using Arabic numerals and be given a brief descriptive title. Tables must be cited in the text (e.g., “As shown in Table 1, ...”). It is recommended that each table should also include a brief explanatory legend. An allowance for any tables should be deducted from the above depending on their size (approximately 200 words per quarter print page).
- *Figures* should be numbered using Arabic numerals and be given a brief descriptive title and an explanatory legend, if required. Figures must be cited in the text. Care should be taken to ensure that lettering and detail will be legible after any size reduction necessary for publication. Figures must be supplied in a form suitable for reproduction: preferably high resolution bitmaps (e.g., jpg, 300 dpi). An allowance for any figures should be deducted from the above depending on their size (approximately 200 words per quarter print page).
- *Electronic Supplementary Materials*: The Electronic Supplementary Material (ESM) will not be printed and is not included in the word count. Please follow the instructions below.

- *Biographical information* about each author, containing max. 50 words
- *References*: Authors are responsible for checking the accuracy of all references, including their *dois*. Reference citations in the text and in the reference list should conform to the APA Manual. All references listed have to be cited in the text.
- *Language*: All manuscripts must be submitted in English. It is strongly recommended that nonnative speakers of English have their manuscripts edited and corrected by a native-speaker colleague before submission.
- Any other information that will guarantee a fair and unbiased review process.

Electronic Supplementary Materials

Electronic supplementary material (ESM) contains additional items that are not essential for inclusion in the full text but would nevertheless benefit the reader (e.g., raw data sets). Being electronic, ESM can also include items that cannot, at this time, be produced in print form. ESM will be published online as received from the author(s) without any conversion, testing, or reformatting. They will not be checked for typographical errors or functionality. The responsibility for the content and functionality remains entirely with the author(s).

Hogrefe Publishing does not provide technical support for the creation or viewing of the supplementary files. If necessary, authors should seek the assistance of their local IT department. Like the manuscript, ESM should be original and not previously published. If previously published, it must be submitted with the necessary permissions. Note that the ESM files, just like the article itself, are permanent records and may not be altered once they have been published online.

Submission

ESM files will be subjected to peer review along with the article itself. The number of ESM files you submit should be limited to 10. The file size should be kept as small as possible, not exceeding 10 MB in total. All file formats are accepted with the exception of executable files (e.g., .exe, .com, or .msi). Commonly used file formats that are accessible by most readers are preferred. Following the online instructions, submit the ESM files in a single zip file separate from the other files that are part of your submission.

Citation in Manuscript

All ESM files must be referred to with intext citations (as for tables, figures, and appendices) and should be numbered in the order in which they are cited in the text.

Follow the example:

- For more information, listen to the audio file in Electronic Supplementary Material 1.

or:

- (listen to the audio file in Electronic Supplementary Material 1)

or:

–(the audio file is provided in Electronic Supplementary Material 1)

If appropriate, you may combine several ESM elements into a single file. For example:

– See Tables 1–3 in Electronic Supplementary Material 1.

Include a section headed “Electronic Supplementary Material” at the end of your article before the reference section. List all files in the order in which they are cited in the text. Provide a title for each ESM file along with the file name. Optionally, you may also provide a short description for each file (max. 20 words). Follow the example:

– ESM 1. Audio file (mp3). (= title and file name)

This audio file contains utterances of the study participants. (= description of file)

– ESM 1. Tables 1–3 (xlsx). (= title and file name)

The tables show additional *p*-values, weather variables, and demographic characteristics. (= description of file)

Make sure that the file names listed here match the names of the submitted files. Please note that only the title and the description will appear in the article; the file name will not. It is for reference purposes only.

Proofs

PDF proofs will be sent to the corresponding author. Changes of content or stylistic changes may only be made in exceptional cases in the proofs. Corrections that exceed 5% of the typesetting costs may be invoiced to the authors.

Offprints

The corresponding author of each accepted paper will receive free online access to the published version of the paper when it is first released online. The author may download the PDF of the published version of record. It is provided for the author’s personal use, including for sharing with coauthors (see also “Guidelines on sharing and use of articles in Hogrefe journals” on the journal’s web page at www.hogrefe.com/j/med).

Copyright Agreement

By submitting an article, the author confirms and guarantees on behalf of him-/herself and any co-authors that the manuscript has not been submitted or published elsewhere, and that he or she holds all copyright in and titles to the submitted contribution, including any figures, photographs, line drawings, plans, maps, sketches, and tables, and that the article and its contents do not infringe in any way on the rights of third parties. The author indemnifies and holds harmless the publisher from any third-party claims.

The author agrees, upon acceptance of the article for publication, to transfer to the publisher the exclusive right to reproduce and distribute the article and its contents, both physically and in nonphysical, electronic, or other form, in the journal to which it has been submitted and in other independent publications, with no limitations on the number of copies or on the form or the extent of distribution. These rights are transferred for the duration of copyright as defined by international law. Furthermore, the author transfers to the publisher the following exclusive rights to the article and its contents:

1. The rights to produce advance copies, reprints, or offprints of the article, in full or in part, to undertake or allow translations into other languages, to distribute other forms or modified versions of the article, and to produce and distribute summaries or abstracts.
2. The rights to microfilm and microfiche editions or similar, to the use of the article and its contents in videotext, teletext, and similar systems, to recordings or reproduction using other media, digital or analog, including electronic, magnetic, and optical media, and in multimedia form, as well as for public broadcasting in radio, television, or other forms of broadcast.
3. The rights to store the article and its content in machine-readable or electronic form on all media (such as computer disks, compact disks, magnetic tape), to store the article and its contents in online databases belonging to the publisher or third parties for viewing or downloading by third parties, and to present or reproduce the article or its contents on visual display screens, monitors, and similar devices, either directly or via data transmission.
4. The rights to reproduce and distribute the article and its contents by all other means, including photo-mechanical and similar processes (such as photocopying or facsimile), and as part of so-called document delivery services.
5. The right to transfer any or all rights mentioned in this agreement, as well as rights retained by the relevant copyright clearing centers, including royalty rights to third parties.

Online Rights for Journal Articles

Guidelines on authors' rights to archive electronic versions of their manuscripts online are given in the document "Guidelines on sharing and use of articles in Hogrefe journals" on the journal's web page at www.hogrefe.com/j/med.
