New in this edition:

- Third-generation antipsychotics with major additions and changes
- Pharmacogenomics fully revised
- ECT thoroughly revised and updated
- BLT/rTMS with extended references
- Extrapyramidal side effects chart extended
- Antidepressants vilazodone and vortioxetine with extended coverage
- New chart of agents under investigation for treatment of substance use disorders
- Approved and off-label indications updated
- New unapproved treatments with significant updates, including anti-inflammatories, hormones, and 5-HT₃ antagonists, in depression, dementia, schizophrenia, and anxiety disorders
- New agents include: TGAs *N*-arylpiperazine (brexiprazole, Rexulti) and phenylpiperazine: (cariprazine, Vrylar), hypnotic suvorexant (Belsomra)
- New formulations and trade names include: Brisdelle (paroxetine mesylate), Irenka (duloxetine capsules), Invega Trinza, Dyanavel XR, Evekeo, Zenzedi, Adzenys XR-ODT, Aptensio XR, Quillichew ER / Quilivant XR

The *Clinical Handbook of Psychotropic Drugs* has become a standard reference and working tool for psychiatrists, psychologists, physicians, pharmacists, nurses, and other mental health professionals.

- Independent, unbiased
- Packed with unique, easy-to-read comparison charts and tables (dosages, side effects, pharmacokinetics, interactions...) for a quick overview of treatment options
- Succinct, bulleted information on all classes of medication: on- and off-label indications, side effects, interactions, pharmacodynamics, precautions in the young, the elderly, and pregnancy, nursing implications, and much more – all you need to know for each class of drug
- Potential interactions and side effects summarized in comparison charts
- With instantly recognizable icons and in full color throughout, allowing you to find at a glance all the information you seek
- Clearly written patient information sheets available for download as printable PDF files

This book is a must for everyone who needs an up-to-date, easy-to-use, comprehensive summary of all the most relevant information about psychotropic drugs.

The definitive, practical handbook for counselors, psychologists, and coaches wishing to apply positive psychology and character strengths concepts in practice!

Working with client's (and our own) character strengths improves the outcome of counseling, coaching, and therapy. It boosts well-being, fosters resilience, improves relationships, and creates strong, supportive cultures in our practices, classrooms, and organizations. This unique evidence-based practitioner's guide brings together the vast experience of the author with the science and practice of positive psychology in such a way that both new and experienced practitioners will benefit.

In the first part of the book, new practitioners will learn about the core VIA Institute concepts of character and signature strengths and how to fine-tune their approach and troubleshoot. Experienced practitioners will deepen their knowledge about advanced topics such as overuse, strengths collisions, morality, and integrating savoring, flow,

and mindfulness. Hands-on practitioner tips throughout the book provide valuable hints on how to take a truly strengths-based approach. In the second part, 24 summary sheets on each character strength are an indispensable resource for client sessions, succinctly summarizing the core features of each strength. 67 step-by-step activity handouts can be given to clients to help them develop character strengths awareness and use, increase resilience, set and meet goals, develop positive relationships, and find meaning and engagement in their daily lives.

No matter what kind of practitioner you are – therapist, counselor, coach, teacher, or manager – this book will help you put the science of character strengths into action.

About the Author

Ryan Niemiec, PhD; PsyD, (pronounced “knee-mick”) is Education Director of the VIA Institute on Character, the global, nonprofit positive psychology organization that educates people about the latest science and practice of character strengths. He is a licensed psychologist, certified coach, international workshop leader, and is Adjunct Professor at Xavier University in Cincinnati, Ohio.

He is coauthor of *Positive Psychology at the Movies* (2014) and *Movies and Mental Illness* (2014). In 2011, Ryan received the Distinguished Early Career Award from the American Psychological Association (Division 46).

Ryan has led several hundred mindfulness meditation groups for clinical and nonclinical populations over the last decade, and has delivered mindfulness retreats, seminars, and workshops to

a variety of groups, including physicians, counselors, religious leaders, and the general public.

Ryan created Mindfulness-Based Strengths Practice (MBSP) out of his ongoing passion for the two topics. MBSP marks the first, structured character strengths program and one of the first mindfulness programs to explicitly focus on what is best in people. He has enjoyed training the early pioneers in this approach.

Presenting the latest research on applied psychological measurement.

The *Zeitschrift für Psychologie*, originally founded in 1890, is the oldest psychology journal in Europe and the second oldest in the world. One of the founding editors was Hermann Ebbinghaus. Since 2007, it is published in English and devoted to topical issues that provide state-of-the-art overviews of current research in psychology.

The *Zeitschrift für Psychologie* publishes high-quality research from all branches of empirical psychology that is clearly of international interest and relevance, and does so in four topical issues per year. Each topical issue is carefully compiled by guest editors and generally features one broad Review Article accompanied by Original Articles from leading researchers as well as additional shorter contributions such as Research Spotlights (presenting details of individual studies

or summaries of particularly interesting work in progress), Horizons (summarizing important recent or future meetings or outlining future directions of work), and Opinion pieces that provide a platform for both established and alternative views on aspects of the issue's topic. The guest editors and the editorial team are assisted by an experienced international editorial board and external reviewers to ensure that the journal's strict peer-review process is in keeping with its long and honorable tradition of publishing only the best of psychological science. The subjects being covered are determined by the editorial team after consultation within the scientific community, thus ensuring topicality. The *Zeitschrift für Psychologie* thus brings convenient, cutting-edge compilations of the best of modern psychological science, each covering an area of current interest.

Keep up-to-date with recent research and practice in suicide

This book is based on the TRIPLE i in Suicidology international conferences, which are organised annually by the Slovene Centre for Suicide Research in memory of the late Prof. Andrej Marušič with the aim of promoting intuition, imagination, and innovation in the research and prevention of suicide and suicidal behaviour. The carefully selected chapters provide food for thought to practitioners, researchers, students, and all those who come into contact with the tragedy of suicide, with the hope of stimulating new ideas and interventions in the difficult fight against suicidal behaviours.

In four parts, the internationally renowned team of authors summarise the achievements of suicidology so far (both in quantitative and qualitative research), present effective interventions in suicide prevention (including for youths and older people) and knowledge gained in bereavement and postvention studies (such as in different cultures and those bereaved by suicide), and highlight future directions for suicide research and prevention.

The volume is thus a useful resource for all those interested in keeping up-to-date with recent research and practice in suicide.

About the Editors

Diego De Leo, MD, PhD, Doctor of Science and Emeritus Professor of Psychiatry, Griffith University, Australia, is the Head of the Slovene Centre for Suicide Research (UP IAM). He has been a world-leading researcher in suicide research and prevention over several decades. He has designed and advised suicide prevention activities, projects, and programs around the world, including his contribution to the World Health Organization.

Vita Poštuvan, PhD, Doctor of Psychology and Assistant Professor of Psychology, is the Deputy Head of the Slovene Centre for Suicide Research (UP IAM). She is involved in research, therapeutic and public-health work related to suicidal behaviour, bereavement, and crisis interventions. She is active in international cooperations promoting mental health.

Thought-provoking contributions from the world of the Rorschach – including a special issue on Neuroscience and the Rorschach

This latest volume of *Rorschachiana* illustrates the diversity of ideas and applications that projective methods offer. The general section includes a diverse blend of innovative articles, including a comparison of the Rorschach and the Zulliger Test, a thought-provoking discussion of Rorschach content analysis, and a case study of a patient with borderline personality disorder.

The special issue dedicated to Neuroscience and the Rorschach presents current and international scientific research carried out on and with the Rorschach, showing that the Rorschach can be considered a useful tool for both personality and neuropsychological assessment.

Editorial Board Members

Editor-in-Chief

Sadegh Nashat, University of Geneva, Switzerland

Advisory Editor

Anne Andronikof, France

Associate Editors

Hiroshi Kuroda, Japan / Justine McCarthy Woods, UK /
Gregory J. Meyer, USA / Fernando Silberstein, Argentina

International Society for the Rorschach Board of Assessors

New Releases in 2017

Sadegh Nashat (Editor)

Rorschachiana

Journal of the International Society for the Rorschach, Vol. 37

Table of Contents

Issue 1

Special Issue: Neuroscience and the Rorschach

Editorial

Inkblots and Neurons: Correlating Typical Cognitive Performance With Brain Structure and Function

Emiliano Muzio

Original Articles

Neuropsychological Factors and Rorschach Performance in Children

Gregory J. Meyer

The Rorschach Coping Deficit Index as an Indicator of Neurocognitive Dysfunction

Tuula Ilonen, Raimo K. R. Salokangas, and Turku Study Group

Differences in Brain Hemodynamics in Response to Achromatic and Chromatic Cards of the Rorschach: A fMRI Study

Masahiro Ishibashi, Chigusa Uchiyumi, Minyoung Jung, Naoki Aizawa, Kiyoshi Makita, Yugo Nakamura, and Daisuke N. Saito

The Effects of Neurological Priming on the Rorschach: A Pilot Experiment on the Human Movement Response

Luciano Giromini, Donald J. Viglione, Emanuela Brusadelli, Alessandro Zennaro, Marzia Di Girolamo, and Piero Porcelli

Rorschach Nomological Network and Resting-State Large Scale

Brain Networks: Introducing a New Research Design

Stefania Cristofanelli, Claudia Pignolo, Laura Ferro, Agata Ando, and Alessandro Zennaro

Issue 2

Editorial

Promoting Diversity

Sadegh Nashat

Research Article

Issues About Color, Human Movement, and Number of Responses in the Zulliger Test

Anna Elisa de Villemor-Amaral, Giselle Pianowski, and Lucas de Francisco Carvalho

Original Articles

Dimensions of the Rorschach Comprehensive System: Parallel Analysis and Principal Component Analysis of a European Adult Nonpatient Sample

Patrick Fontan, Anne Andronikof, Carl-Erik Mattlar, and Christian Mormont

How to be ConTENT With Rorschach ConTENT

Charles A. Peterson

Case Study

From the "Imperfect Illness" to the Possibility of Developing Good Internal Objects: Psychoanalytic Psychotherapy of Patients With Borderline Personality Disorder With Follow-Up by the Rorschach

Maria Luiza de Mattos Fiore, Norma Lottenberg Semer, and Latife Yazigi

Book Review

Not So Abnormal Psychology

Marianne Nygren

£ 27.90

Educational neuroscience is an interdisciplinary field that has emerged through the improvement of brain imaging techniques and investigates human learning inside and outside of schools. In this issue, leading experts look back at the progress made within the field over the last decade, focusing on the bidirectional relationship between neuroscience and behavioral research.

Topics include:

- Brain functioning in children with dyslexia
- The effects of training on brain functions
- Individual differences in brain functioning
- The neural underpinnings of error processing
- Insight emergence
- Cognitive load, and
- The effects of modalities.

The *Zeitschrift für Psychologie*, originally founded in 1890, is the oldest psychology journal in Europe and the second oldest in the world. One of the founding editors was Hermann Ebbinghaus. Since 2007, it is published in English and devoted to topical issues that provide state-of-the-art overviews of current research in psychology.

The *Zeitschrift für Psychologie* publishes high-quality research from all branches of empirical psychology that is clearly of international interest and relevance, and does so in four topical issues per year. Each topical issue is carefully compiled by guest editors and generally features one broad Review Article accompanied by Original Articles from leading researchers as well as additional shorter contributions such as Research Spotlights (presenting details of individual studies

or summaries of particularly interesting work in progress), Horizons (summarizing important recent or future meetings or outlining future directions of work), and Opinion pieces that provide a platform for both established and alternative views on aspects of the issue's topic. The guest editors and the editorial team are assisted by an experienced international editorial board and external reviewers to ensure that the journal's strict peer-review process is in keeping with its long and honorable tradition of publishing only the best of psychological science. The subjects being covered are determined by the editorial team after consultation within the scientific community, thus ensuring topicality. The *Zeitschrift für Psychologie* thus brings convenient, cutting-edge compilations of the best of modern psychological science, each covering an area of current interest.

New Releases in 2017

Elsbeth Stern / Roland H. Grabner / Ralph Schumacher (Editors)

Neuroscience and Education

Added Value of Combining Brain Imaging and Behavioral Research
Zeitschrift für Psychologie, Vol. 224/4

Table of Contents

Editorial

Educational Neuroscience – A Field Between False Hopes and Realistic Expectations

by *Elsbeth Stern, Roland H. Grabner, and Ralph Schumacher*

Review Articles

Development of Reading Remediation for Dyslexic Individuals: Added Benefits of the Joint Consideration of Neurophysiological and Behavioral Data

by *Mélanie Bédard, Line Laplante, and Julien Mercier*

A Systematic Review of the Literature Linking Neural Correlates of Feedback Processing to Learning

by *Jan-Sébastien Dion, and Gérardo Restrepo*

Original Articles

The Effect of a Prospected Reward on Semantic Processing: An N400 EEG study

by *Sanne H. G. van der Ven, Sven A. C. van Touw, Anne H. van Hoogmoed, Eva M. Janssen, and Paul P. M. Leseman*

Proportional Reasoning: The Role of Congruity and Salience in Behavioral and Imaging Research

by *Ruth Stavy, Reuven Babai, and Arava Y. Kallai*

The Learning Brain: Neuronal Recycling and Inhibition

by *Emmanuel Ahr, Grégoire Borst, and Olivier Houdé*

Spotlights

Event-Related Potentials (ERPs) Reflecting Feedback and Error Processing in the Context of Education

by *Frieder L. Schillinger*

Neuroscience-Based Approaches to Teaching Students on the Autism Spectrum

by *Debbie Cockerham and Evie Malaja*

Measuring Implicit Cognitive and Emotional Engagement to Better Understand Learners' Performance in Problem Solving

by *Patrick Charland, Pierre-Majorique Léger, Julien Mercier, Yannick Skelling, and Hugo G. Lapierre*

Behavioral and Neural Effects of Game-Based Learning on Improving Computational Fluency With Numbers: An Optical Brain Imaging Study

by *Murat Perit Çakır, Nur Akkuş Çakır, Hasan Ayaz, and Frank J. Lee*

Opinion

Dyslexia Intervention – What Can We Learn From Neuroscience?

by *Karin Landerl and Chiara Banfi*

What Are the Benefits and Potential Problems of Jointly Considering Neurophysiological and Behavioral Data in Dyslexia Intervention Research?

by *Wolfgang Schneider*

Learning in Development and Education – a Mechanistic Understanding Is Needed

by *Tobias U. Hauser*

What Does Brain Activation Tell Us About Numerical Congruity and Salience?

by *Andreas Obersteiner*

The Origin and Functional Organization of Cortical Areas Involved in Reading

by *Daniel Kiper*

The Long and Winding Road to Educationally Relevant Cognitive Neuroscience

by *Lieven Verschaffel*
