### Behavioral sciences for the next generation of health care providers

The fourth edition of *The Behavioral Sciences and Health Care* provides trainees in every area of health care with foundational concepts of behavioral science as applied to individual and population health and disease. The text breathes new life into the biopsychosocial model by highlighting the integrated sciences model, which focuses on interdependence of the contributions made by all of the sciences basic to medicine. This integration is exemplified by the unifying conceptual framework of evolutionary science, in which increasingly complex gene–individual–environmental interactions explain behavior at the individual and social level.

Concise, updated chapters cover foundational elements of neuroscience, stress biology, normal psychology, and social factors in health care, addressing both traditional areas of behavioral science and topical concerns such as pain, palliative care, addictions, health care disparities, and violence. Uniquely among books of this kind, the text

includes a thorough discussion of psychiatric disorders and therapies, aligned with current nosology (DSM-5). All chapters contain clinical pearls or vignettes, highlighted to emphasize applications in health care settings, as well as review questions and suggestions for further reading. A practice exam with extensive discussion of answers deepens students' understanding of core topics while preparing them for certifying and licensing exams.

This text is particularly suited for use in systems-based and case-based curricula. Individual chapters can be used creatively in flipped classrooms and other active learning environments. Accessible and clear, without oversimplification, the book facilitates interdisciplinary education, providing a common core of knowledge for students in medicine, nursing, psychology, social work, and other health care professions.

**“The fourth edition of this text book continues the wonderful tradition of providing for students of medicine and other health professions, in a single source, information usually found in textbooks from various disciplines, including psychology, biology, health psychology, public health, and clinical medicine.”**

Barry A. Hong, PhD, ABPP, Professor of Psychiatry and Medicine at Washington University, St. Louis, MO

# New Releases in 2017

Olle Jane Z. Sahler / John E. Carr / Julia B. Frank / João V. Nunes (Editors)

## The Behavioral Sciences and Health Care

4th edition

### Table of Contents

#### Section I: The Behavioral Sciences and Health

1 Evolving Models of Health Care by *J. E. Carr, O. J. Z. Sahler, J. B. Frank, and J. V. Nunes*

#### Section II: Regulatory Systems

2 Predisposition by *J. V. Nunes, I. M. Kodish, and J. E. Carr*

3 The Nervous System by *J. V. Nunes, I. M. Kodish, and J. B. Frank*

4 Brain Networks in Health and Illness by *M. I. Posner and M. K. Rothbart*

#### Section III: Basic Homeostatic Systems

5 Energy Homeostasis by *E. D. LaMotte and E. A. Schur*

6 Chronobiology and Sleep Disorders by *J. V. Nunes, G. Jean-Louis, F. Zizi, and A. Seixas*

7 Stress, Adaptation, and Stress Disorders by *J. E. Carr, I. M. Kodish, and P. P. Vitaliano*

8 Pain by *J. Dasika, N. Mai, and J. L. Kent*

#### Section IV: Higher Order Homeostatic Systems

9 Emotion and Learning by *J. E. Carr and I. M. Kodish*

10 Cognition, Communication, and Social Interaction by *J. E. Carr and I. M. Kodish*

#### Section V: Development Through the Life Cycle

11 Selected Theories of Development by *L. D. Herzog, E. F. Myers, and F. C. Bennett*

12 The Fetus, Newborn, and Infant by *E. F. Myers, L. D. Herzog, and F. C. Bennett*

13 Toddlerhood and the Preschool Years by *E. F. Myers, L. D. Herzog, and F. C. Bennett*

14 The School Years by *E. A. McCauley*

15 The Adult Years by *J. A. H. Farrow*

16 The Family by *J. LeBron McBride*

#### Section VI: Social and Cultural Issues

17 Culture and Cultural Competence in Health Care by *M. Camacho-Rivera*

18 Health Care in Minority and Majority Populations by *M. C. Hosokawa*

19 Sexuality and Sexual Disorders by *C. P. Samenow and K. Y. Salas-Ramirez*

20 Health Care Issues Facing Lesbian, Gay, Bisexual, and Transgender Individuals by *D. W. Pantalone, D. C. Haldeman, and C. R. Martell*

21 Geriatric Health and Successful Aging by *P. M. Lenahan*

#### Section VII: Societal and Behavioral Health Challenges

22 Obesity by *S. R. Cook and K. A. Evans*

23 Eating Disorders by *R. E. Kreipe and T. B. Starr*

24 Substance-Related and Addictive Disorders by *M. F. Gómez and J. V. Nunes*

25 Interpersonal Violence and Abuse by *R. Maiuro and N. K. Sugg*

26 Poverty and Homelessness by *K. Ramsey McGowen*

27 Suicide by *A. L. Chapman, J. Ferreira, and K. C. Law*

28 Understanding and Improving Health Literacy by *J. L. Calderón*

#### Section VIII: The Health Care System, Policy, and Economics

29 The US Health Care System by *T. T. Chee and J. S. Catalanotti*

30 Theories of Social Relations and Interprofessional Collaboration by *B. Michalec and F. W. Hafferty*

31 Moral, Ethical, and Legal Issues in Patient Care by *M. H. Shaw*

32 Complementary and Integrative Medicine by *H. H. McClafferty and O. J. Z. Sahler*

33 Palliative Care by *T. E. Quill and E. M. Denney-Koelsch*

#### Section IX: The Clinical Relationship

34 The Provider-Patient Relationship by *D. C. Russo, M. E. Carraway, and L. C. Larsen*

35 The Medical Encounter and Clinical Decision Making by *J. M. Firnhaber, D. C. Russo, and L. C. Larsen*

36 Motivating Healthy Behaviors by *R. J. Botelho*

37 Physician Health, Impairment, and Misconduct by *C. P. Samenow*

#### Section X: Psychopathology

38 Introduction to Psychopathology by *J. B. Frank*

39 The Psychiatric Evaluation by *J. B. Frank*

40 Principles of Psychotherapy by *J. B. Frank and J. E. Carr*

41 Disorders of Infancy, Childhood, and Adolescence by *R. R. Pleak and J. V. Nunes*

42 Schizophrenia and Other Psychotic Disorders by *S. M. Lillrank*

43 Depressive and Bipolar Disorders by *R. P. Houghtalen and R. F. Houghtalen*

44 Anxiety Disorders by *R. P. Houghtalen and J. B. Frank*

45 Neurocognitive Disorders: Delirium and Secondary Syndromes by *J. B. Frank and M. Peroski*

46 Neurocognitive Disorders: Dementia by *M. Peroski and J. B. Frank*

47 Stress Disorders, Bereavement, and Dissociative Disorders by *J. B. Frank*

48 Obsessive-Compulsive and Related Disorders by *J. B. Frank*

49 Disruptive, Impulse-Control, and Conduct Disorders by *M. R. Herbert and J. B. Frank*

50 Somatic Symptom and Related Disorders by *J. B. Frank and S. H. Cho*

51 Personality Disorders by *M. R. Herbert and J. B. Frank*

52 Pharmacological Interventions for Psychiatric Disorders by *M. R. Herbert and J. B. Frank*

#### Appendix: Psychological Testing Practice Exam

### The 9th edition of this valuable tool for assessing and documenting psychopathology, now in English!

Now in its 9th edition, the AMDP System is a widely used tool for documenting psychiatric symptoms in clinical and research projects. It is not only an essential part of many internal clinical documentation systems, but it is also a valuable instrument for training the identification of psychopathological symptoms.

This new edition, now in English, involved the complete revision of the psychopathological and somatic symptoms, with particular attention to the elimination of ambiguities and inconsistencies, to the precision of definitions, to the exact differentiation of the self and other ratings, as well as to the user friendliness of the system. Taking account of

developments in recent years in the description and rating of psychopathological symptoms, this latest edition of the AMDP System has been extended by an additional eleven psychopathological and three somatic symptoms and a new section on syndrome formation in the appendix.

This clearly structured manual enables the standardized application of the system, making it an invaluable tool in the training of medicine and psychology students and an essential reference volume in the psychiatric field.

## The AMDP System

Manual for Assessment and Documentation of Psychopathology in Psychiatry

### Table of Contents

#### Preface

#### Preface to the Ninth German Edition

#### Introduction

AMP Founding Members

AMP/AMDP System Chair

AMDP Registered Association Chair

AMDP Revision Group (9th edition)

#### 1 Introduction

- 1.1 Overall Structure of the AMDP System
- 1.2 Representation of Individual Symptoms in the Manual
- 1.3 Requirements for Use
  - 1.3.1 General Requirements for Use
  - 1.3.2 AMDP Training Seminars
- 1.4 Recording Basics
  - 1.4.1 General Considerations
  - 1.4.2 Assessment Basics
  - 1.4.3 Time Frame of Assessment Period
  - 1.4.4 Documentation
- 1.5 The Formal Logic of the Decision-Making Process
  - 1.5.1 Evaluation Level 1: Accessibility and Nonaccessibility
  - 1.5.2 Evaluation Level 2: Degree of Certainty Over Presence or Absence of a Symptom
  - 1.5.3 Evaluation Level 3: Presence
  - 1.5.4 Evaluation Level 4: Degree of Severity
- 1.6 Data Processing
- 1.7 The AMDP Personal History

#### 2 Psychopathological Findings

- 2.1 Preliminary Notes
- 2.2 Disorders of Consciousness

- 2.3 Disturbances of Orientation
- 2.4 Disturbances of Attention and Memory
- 2.5 Formal Thought Disorder
- 2.6 Worries and Compulsions
- 2.7 Delusions
- 2.8 Disorders of Perception
- 2.9 Ego (Boundary) Disturbances
- 2.10 Disturbances of Affect
- 2.11 Disturbances of Drive and Psychomotor Activity
- 2.12 Circadian Disturbances
- 2.13 Other Disturbances
- 2.14 Additional Psychopathological Items (ZP1–ZP11)

#### 3 Somatic Findings

- 3.1 Disturbances of Sleep and Vigilance
- 3.2 Appetitive Disturbances
- 3.3 Gastrointestinal Disturbances
- 3.4 Cardiac–Respiratory Disturbances
- 3.5 Other Autonomic Disturbances
- 3.6 Other Somatic Disturbances
- 3.7 Neurological Disturbances
- 3.8 Additional Somatic Items (ZS1–ZS3)

### About the Editors

**Matthew R. Broome, PhD, MRCPsych**, is Professor of Psychiatry and Youth Mental Health and Director at the Institute for Mental Health, University of Birmingham, UK; Senior Clinical Research Fellow, Department of Psychiatry and Faculty of Philosophy, University of Oxford, UK.

Matthew is a founding member of the Maudsley Philosophy Group.

**Ronald Bottlender, MD, PhD**, is the Clinical Director, Department of Psychiatry and Psychotherapy, Märkische Kliniken, Lüdenscheid, Germany, assistant professor, University of Bochum and lecturer, University of Bonn, Germany.

He has published more than 100 peer reviewed articles on psychosis, affective disorders, amongst others.

**Michael Rösler, MD, PhD**, is the Head of the Institute of forensic Psychiatry, Homburg/Saarland, Germany, and Emeritus Professor at the University of the Saarland, Germany. During the last decades he has been engaged in adult ADHD research.

He is the current Chair of the Association of Methodology and Documentation in Psychiatry (AMDP).

**Rolf-Dieter Stieglitz, PhD**, is Professor of Clinical Psychology and Psychiatry and the Head of the Department of Clinical Psychology and Psychiatry, University of Basel, Switzerland.

He has published more than 600 papers and books, especially in the field of psychopathology and clinical assessment. He was previously the Chair of the AMDP 2006–2012.

## Fundamentals of Psychology; Research methods

For researchers, teachers, and students concerned with implicit theories.

Marko Lüftenegger / Jason A. Chen (Editors)

## Implicit Theories

The Role and Impact of Malleable Mindsets

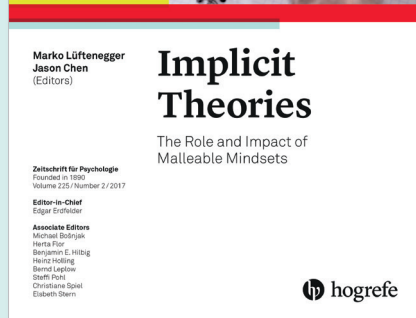

Zeitschrift für Psychologie, Vol. 225/2  
2017. iv + 70 pp., large format  
ISBN 978-0-88937-499-7

### Softcover

Dimensions:  
8.25 x 11 inches  
21.0 x 27.7 cm

### Prices

US \$49.00  
CAN \$48.80  
€ 34.95  
CHF 45.50  
£ 27.90

Individuals develop fundamental assumptions about human attributes to explain and understand their world. These implicit theories incorporate beliefs about the fixedness or malleability of personal attributes such as intelligence, willpower, and personality, and organize the way people ascribe meaning to events. Although implicit beliefs can be held stably, empirical findings show that they can also be primed and changed in brief laboratory experiments or in longer-term interventions. This offers manifold opportunities for shaping individuals' implicit theories in different contexts. For research, this means that implicit theories have a high interdisciplinary appeal.

This volume brings together current research on implicit theories from different psychological subdisciplines that investigates implicit theories in individuals from Asia (Philippines), Australia, Europe (Germany, Norway, Switzerland), and the United States in different domains (education, health, willpower) using cross-sectional, longitudinal, and experimental designs. The papers provide current research on implicit theories and their effects on attitudes, thoughts or behavior, and report on cross-cultural effects of interventions designed to influence implicit theories.

The *Zeitschrift für Psychologie*, originally founded in 1890, is the oldest psychology journal in Europe and the second oldest in the world. One of the founding editors was Hermann Ebbinghaus. Since 2007, it is published in English and devoted to topical issues that provide state-of-the-art overviews of current research in psychology.

The *Zeitschrift für Psychologie* publishes high-quality research from all branches of empirical psychology that is clearly of international interest and relevance, and does so in four topical issues per year. Each topical issue is carefully compiled by guest editors and generally features one broad Review Article accompanied by Original Articles from leading researchers as well as additional shorter contributions such as Research Spotlights (presenting details of individual studies

or summaries of particularly interesting work in progress), Horizons (summarizing important recent or future meetings or outlining future directions of work), and Opinion pieces that provide a platform for both established and alternative views on aspects of the issue's topic. The guest editors and the editorial team are assisted by an experienced international editorial board and external reviewers to ensure that the journal's strict peer-review process is in keeping with its long and honorable tradition of publishing only the best of psychological science. The subjects being covered are determined by the editorial team after consultation within the scientific community, thus ensuring topicality. The *Zeitschrift für Psychologie* thus brings convenient, cutting-edge compilations of the best of modern psychological science, each covering an area of current interest.

### A unique, succinct treatment manual based on evidence-based approaches to repairing parent–child relationships

Childhood problems are often related to and worsened by the disintegration of the family structure, whether through parental separation and divorce, military service, or incarceration. Reunification therapy is a therapeutic process incorporating different empirically based methods (CBT, humanistic, and systemic) to help repair relationships between parents and children and restore not only physical contact but also meaningful social, emotional, and interpersonal exchanges between parents and children.

This unique manual, bringing together the vast experience of the author, outlines the many situations many families currently face and why the need for reunifi-

cation therapy exists. The therapist works firstly with the individual family members and then with all the family in conjoint sessions.

The manual expertly guides clinicians through pretreatment decisions and processes to enable them to decide where, when, and in what form reunification therapy is appropriate, taking into account ethical, legal and special family issues. Detailed chapters outline the structure and issues for the individual and conjoint sessions, as well as a step-by-step treatment plan template. Additional tools in the Appendix enable clinicians to monitor and effectuate change.

## About the author

**Dr. Jan Faust, PhD**, is Professor at the College of Psychology Faculty, Nova Southeastern University (NSU), Fort Lauderdale, FL. Dr. Faust developed the Child and Adolescent Traumatic Stress Program, which is a clinical, training, and research facility serving children exposed to traumatic events. She has conducted various research projects, and currently she is conducting treatment

outcome research on treatment efficacy for families in reunification therapy, parent empathy training, and children with posttraumatic stress disorder. She has published many articles in peer-reviewed journals and book chapters in the field of child, adolescent, and family psychology.

## Reunification Family Therapy

A Treatment Manual

### Table of Contents (preliminary)

#### Preface

#### 1: Introduction to Family Structure and Fragmentation of the Family

#### 2: Bases and Elements of Reunification Therapy

Mechanisms Responsible for Breaches in Parent-Child Relationship  
Why Does the Need Exist for Reunification Therapy?  
Why Not Let the Child Decide? Application of Developmental Psychology  
Spontaneous Reunification  
Treatment Selection Guided by Empirical Evidence and Specific Characteristics of Family Reunification Therapy: Terms and Related Concepts  
Alienation, Estrangement, and Interference  
Factitious Disorder Imposed by Another  
Gatekeeping

#### 3: Reunification Therapy as a Specific Form of Empirically Based Family Therapy

What Reunification Therapy Is NOT  
Reunification Therapy: A Composite Treatment  
Cognitive and Behavioral Domains  
Humanistic (Client-Centered) Domain  
Systemic Family Therapy

#### 4: Pretreatment Decisions and Process

Appropriateness for Reunification Therapy in Military Deployment and Institutionalization Cases  
Appropriateness of Reunification Therapy in Family Law, and Guardianship Cases  
Ethical and Legal Considerations  
Informed Consent: Statement of Understanding  
The Contract, Court Order, or Agreed Order  
Do No Harm  
Avoiding Multiple Relationships  
Avoiding Making Custodial and Time-Sharing Recommendations  
Practicing Within the Scope  
Communicating With Attorneys and Allied Professionals Prior to Treatment  
When Reunification Therapy Is Inappropriate  
Necessary Therapist Characteristics

#### 5: Working with the Child

Explanation of the Reunification Process to the Child or Adolescent

#### Establishing Effective Working Relationships:

The Buy In, The Child  
Capitalizing on Children's Natural Curiosity.  
"Are You My Mother?"; "Are you My Father?"  
Assessing and Addressing Resistance: The Child Siblings: A Double-Edged Sword  
Developing an In-Session and Out-of-Session Safety Plan  
Assessing Resistance of Others and Determining Outside Influences  
Critical Collaboration With Other Case-Specific Professionals  
Children's Individual Differences and Special Abilities

#### 6: Working with the Non-Time-Sharing Parent

Initial Therapy Considerations  
Anger and Blame  
Parents Who Have Been "Victimized" and/or Maintain Their Victim Role  
Parents Without Parenting Leverage  
Temporary Abdication of Parenting  
Parents Without Adequate Parenting Competencies and Self-Confidences  
Fear of Rage, Retaliation, and Rejection of the Child and the Alternate Parent  
Ground Rules for Non-Time-Sharing Parents

#### 7: Working with the Time-Sharing Parent

Resistance Versus Intentional Interference  
Enhancement of Time-Sharing Parents' Engagement in Reunification Therapy  
Time-Sharing Parents Require Empathy and Support Too  
Closing Parenting Loopholes  
The Buy-In  
Subterfuge  
Therapist At Risk of Being Thrown Under the Bus

#### 8: Conjoint Sessions and Effecting Change

Initial Non-Time-Sharing Parent-Child Contact  
Staying Present-Focused  
Instructing Parents Not to "Take the Bait": Children's Attempts at Triangulating Parents  
Presenting a Unified Front  
"More Is More"  
Homework: A Necessary Tool  
Utilizing Interparental Electronic Communications

#### to Effectuate Change

Obstacles During Family Treatment  
Including Other Professionals in the Process to Effectuate Change  
Children Who Cannot Separate From Time-Sharing Parent for Reunification Therapy  
Use of Ancillary Strategies to Enhance Contact  
Developing New Traditions  
Enhancing Attachment: Photography and Video-taping  
Planned Termination of Reunification Therapy

#### 9: Legal Processes During and After Treatment

Translucent Legal Agendas (AKA Not-So-Transparent Agendas)  
"Less Is More"

#### 10: Special Topics

Preparing Children When Reunification Is Not Possible  
Reunification Therapy With Other Primary Caretakers  
Reunification Therapy When Physical Distance Is a Factor  
Immersion Interventions: Workshops and Retreats  
Reunification of Infants and Very Young Children With Their Parents

#### 11: Fundamental Treatment Plan

Reunification Therapy for Dissolved Parental Relationships  
Important Notes

#### References

#### Appendices

#### Appendix A: Reunification Therapy: Motivational Interviewing Questions

I. Motivational Interviewing Questions for a Child  
II. Motivational Interviewing Questions for Non-Time-Sharing Parent  
III. Motivational Interviewing Questions for Time-Sharing Parent

#### Appendix B: Reunification Therapy: Behavioral Activation

#### Appendix C: Empathy Training for Parents

### Interdisciplinary approaches to the diagnosis and treatment of mental disorders

Our understanding of the mechanisms guiding adaptive behavior and normal psychological functioning and of how these processes become disrupted in various forms of mental disorders has increased but translating the results of basic psychological research into clinical practice is still in the early stages. One problem for this translation is that the classification of mental disorders is still almost exclusively descriptive. The Research Domain Criteria (RDoC) initiative aims to redress this by promoting the development of an interdisciplinary science of psychopathology that consists of dimensional constructs

integrating models and findings from psychology, biology, and behavioral neuroscience.

This compilation focuses on research in experimental psychopathology that investigates such constructs. It includes theoretical and empirical work on different psychological constructs (such as fear learning and mental imagery) that are relevant for a better understanding of the mechanisms of mental disorders across a large spectrum of categorical diagnoses.
